

Copytrax CD, DVD and Blu Ray Duplicators

Copytrax has a history of expertise and leadership in the field of digital media duplication. Starting with 'floppy disks' we've evolved along with the technology and we now provide the equipment that enables artists and businesses around the world to reproduce **CD's ,DVD's and Blu Ray** media to the highest quality.

Our latest technology can also duplicate **USB Flash drives, SD Cards and Compact Flash** devices.

Ready to use straight out of the box, the Copytrax Tower CD and DVD duplicators are extremely user friendly. With virtually no training at all, you will quickly be copying discs and generating revenue.

This range of professional CD tower and DVD/Blue Ray tower duplicators offer **fast and efficient duplication of CDs, DVDs and Blu Ray at a cost effective price.** The Copytrax duplicators are ideal for small and large runs alike, perfect for both office based disc production right through to full scale, professional publishing environments.

Copytrax... the technology to deliver excellence

Automated CD, DVD and Blu Ray Duplication for Ease and Speed

All commands are entered via the control panel, blank discs are picked from the input spindle by a precision robotic arm and placed into the waiting drives. The CopyDisc 4 Platinum duplicator will then not only automatically detect the type of CD/DVD master without any user intervention, but will also provide "frame accurate" data and audio.

All CopyDisc Platinum models are standalone which means that a PC is not required to operate them. However, as an alternative, it is also possible to network your CopyDisc using DiscPilot networking software, a factory fitted option that provides multiple users with access to a CopyDisc automatic duplicator.

USB Flash Drive Duplicators

Available with between 3 and 118 target USB drives, Copytrax USB PowerTower duplicators are perfect for data-sensitive duplication with no PC intervention for minimum security risks.

The Copytrax USB duplicator offers a secure and reliable duplication service. A compact and stylish design coupled with a bit-by-bit compare function to confirm successful copies, make it a leader in its field.

The **CopyDisc 4 Platinum** delivers easy to use, fully automated CD and DVD duplication. The standalone copier combines a small footprint with the renowned metal framework found on our entire range of CopyDisc Platinum units. The CopyDisc 2/4 Platinum will fit comfortably within any environment, be it an office or a professional production facility.

The CopyDisc 2/4 Platinum is fitted with the very latest industry-leading CD-R or DVD±R drives offering high-speed duplication of up to 220 discs at a time.

SD Card and Compact Flash Duplicators

The Copytrax Card professional duplicator offers fast, efficient and convenient copies of your important data from erasable SD memory cards at a cost effective price. Available with 3, 7, 11, 15 or 23 target drives, Meteor SD Duplicators are perfect for data-sensitive disc production with no PC intervention for minimum security risks.

Copytrax - the complete solution :

In addition to our advanced duplication technology, we can provide a broad range of high quality CD and DVD media. We can also provide a selection of case choices and provide technical support and training where required.

Also - please ask about our range of high quality professional CD, DVD and Blu Ray printing equipment.
